

OneMember — Merchant Sales Presentation

Speaker Notes | MKTG-002 | Confidential | 2026

Slide 1 — The Hook

SLIDE 1 — THE HOOK (1 min)

Do not open with "let me tell you about OneMember." Open with silence and let them read the slide.

Then say: "Every week, customers walk through your door, have a great experience — and never come back. Not because they didn't enjoy it. Because you gave them no reason to remember you."

Pause. Let that land.

Then: "Today I want to show you exactly how much that's costing you — and how to fix it in 10 minutes."

Slide 2 — The Reality

SLIDE 2 — THE REALITY (1.5 min)

Present each stat slowly. After each one, ask: "Does that surprise you?"

The third stat — **0** — is the most devastating. Most merchants know customer X is their regular, but have no systematic record, no contact details, no way to reach them if they disappear.

Say: "Your biggest competitor isn't another business. It's the gap between the customer who walked in yesterday and the moment you forget each other."

Slide 3 — The Cost Calculator

SLIDE 3 — THE COST CALCULATOR (2 min)

This slide should feel personal. Before showing it, say:

"Let me put your specific numbers in here. How many customers do you serve per week? What's your average spend?"

Adjust the equation mentally and share the result. The default is conservative — 200 customers, 60% lapse, **400** average. Many merchants will realise the real number is higher.

Say: "That's not money you're losing to competitors. That's money you already earned — but never collected twice."

This is the emotional peak of the presentation. Do not rush past it.

Slide 4 — The Pivot

SLIDE 4 — THE PIVOT (1 min)

This is the emotional turning point. From pain to possibility.

Don't answer the question yet. Just let it sit.

Say: "That's not a fantasy. That's a number businesses using OneMember actually see. And we can show you exactly how."

Then move to the next slide.

Slide 5 — The Solution

SLIDE 5 — THE SOLUTION (2 min)

This is the first time OneMember is formally introduced. Keep it brief. The product earns its place after the problem is established.

Walk through each pillar: "We built OneMember around five outcomes — not five features. Every one of them exists to do one thing: get your customers to come back."

Do not demo the software yet. That comes in the demo session.

Slide 6 — How It Works

SLIDE 6 — HOW IT WORKS (1.5 min)

Keep this fast. This is process, not pitch.

"The customer experience is three steps: scan, earn, return. That's it. For you, it's even simpler — you set it up once, and it runs."

If the merchant is tech-skeptical, emphasise: "No app download for your customers. No hardware. Just a QR code you print or display on your counter."

Slide 7 — Growth Projection

SLIDE 7 — GROWTH PROJECTION (1.5 min)

Frame this as a story of transformation, not a forecast.

"In month one, you're building your database. In month three, you know your customers by name. In month six, they're coming back because you've given them a reason to. In year one, the cumulative effect is a business that looks fundamentally different."

The ■545K figure is based on conservative assumptions. Invite the merchant to put their own numbers in — the ROI calculator does this precisely.

Slide 8 — Case Studies

SLIDE 8 — CASE STUDIES (2 min)

Note: These are representative examples. If you have real merchant data, replace these now.

Present each case briefly: business type, the result, the quote. Then ask: "Which of these sounds most like your business?"

The goal is to make the merchant visualise themselves in one of these stories. The quote on each case should do the emotional work — let them read it.

Slide 9 — ROI Calculator

SLIDE 9 — ROI CALCULATOR (3 min)

This is the most important slide in the presentation. Personalise it.

Before revealing the calculation, say: "Let me put your numbers in."

Ask: How many customers per week? What's the average spend? Adjust mentally or on the ROI Calculator spreadsheet.

When you show the ■45,000+ figure: "That's not a forecast. That's a conservative estimate based on the average improvement we see at similar businesses."

ROI of 22× means: for every ■1 they spend on OneMember, they get ■22 back. The payback period is under 2 weeks.

Handover: give them the physical ROI Calculator so they can run their own numbers after the meeting.

Slide 10 — Trust & Privacy

SLIDE 10 — TRUST & PRIVACY (1 min)

Some merchants will ask about data privacy unprompted. Many won't — but their customers might.

Say: "We take PDPA seriously because your customers do. A loyalty programme only works if customers trust it. We've built compliance in from day one — not as an afterthought."

Key message: You own your data. We are a tool. Not a data broker.

If the merchant has a DPO or legal contact, offer to send a Data Processing Agreement.

Slide 11 — Urgency

SLIDE 11 — URGENCY (1 min)

Don't be pushy. Let the logic create urgency.

"I'm not here to pressure you. But I want to be honest: the merchants who build their member database first own the loyalty advantage in their area. Once a customer is loyal to a competitor, it's very hard to win them back."

Then: "Every week you wait is a week of data you don't have."

Slide 12 — Risk Reversal

SLIDE 12 — RISK REVERSAL (1 min)

Remove every possible objection before it's raised.

Note: If the ■1,990 pricing needs to be updated, do so before the meeting.

"You have nothing to lose. No contract. No setup fee. If it doesn't work, you cancel and owe nothing. But — and I say this as someone who has seen this work for a lot of businesses — it works."

The "30-day guarantee" is a powerful closer. Lead with it if you sense hesitation.

Slide 13 — Call to Action

SLIDE 13 — CALL TO ACTION (1 min)

The goal of this slide is a single action: open the registration screen together.

Do not leave without doing Step 1 together. Registration takes 5 minutes and means the merchant has skin in the game.

If they won't register today:

- Set a specific follow-up time before you leave
- Send the ROI Calculator with their numbers filled in
- Leave the Merchant FAQ and Objection Handling Guide

Never leave with "I'll think about it" as the outcome. Always leave with a date.
