

OneMember — Merchant Presentation

Speaker Notes

Confidential — Internal Use Only | 2026

Slide 1 — Title

SLIDE 1 — TITLE (TARGET: 1 min)

Open with: "Thank you for taking 20 minutes with us today."

OneMember is a merchant growth platform — not just a loyalty app. Our mission is simple: give every local business the tools that enterprise chains have had for years.

This presentation walks you through the problem, our solution, and why OneMember is different. By the end, we'd love to talk about getting your business started.

Key talking points:

- OneMember is already live and being used by merchants in Thailand
 - This is a 20-minute conversation, not a sales pitch
 - Ask: "What loyalty or membership programme do you run today?"
-

Slide 2 — The Problem Today

SLIDE 2 — THE PROBLEM (TARGET: 2 min)

Set the scene before presenting the product. The merchant must feel understood.

Pain points to emphasise:

- Paper loyalty cards get lost, stolen, or forgotten — merchants have no visibility
- Without data, merchants cannot run targeted promotions or understand customer behaviour
- Customer acquisition costs are rising — it is cheaper to retain than to acquire
- Competitors with digital loyalty programmes gain a measurable advantage
- Existing solutions are either too expensive (enterprise) or too complicated (CRM tools)

Ask: "How do you know which customers haven't been back in 3 months?"

Slide 3 — The Cost of Losing Customers

SLIDE 3 — THE COST OF LOSING CUSTOMERS (TARGET: 1 min)

Let the statistics speak. Do not rush this slide.

- Research: acquiring a new customer costs 5–7× more than retaining an existing one
- Repeat customers spend 67% more on average than new customers
- A 5% increase in retention can increase profit by 25–95% (Bain & Company)

The goal: make retention feel like the highest-ROI activity in the room.

Ask: "If you could bring back 20% of your lapsed customers, what would that mean for your business?"

Slide 4 — Introducing OneMember

SLIDE 4 — INTRODUCING ONEMEMBER (TARGET: 2 min)

OneMember is built around five pillars:

ACQUIRE — digital membership cards, QR-code sign-up, zero friction for customers

RETAIN — automated birthday rewards, point expiry reminders, win-back campaigns

REWARD — points, stamps, tiered rewards — customisable per merchant

UNDERSTAND — real member data: visit frequency, spending patterns, demographics

GROW — intelligence that turns data into action

Positioning: "We are not a loyalty app. We are a merchant growth platform."

Slide 5 — The Merchant Journey

SLIDE 5 — THE MERCHANT JOURNEY (TARGET: 2 min)

Walk through each step. Make it feel achievable.

1. Register → takes 5 minutes, no contract required
2. Campaign → set up your loyalty programme (points, stamps, or hybrid)
3. Members → customers scan your QR code and join instantly
4. Rewards → configure what members earn and what they can redeem
5. Track → view real-time dashboard: active members, redemptions, revenue
6. Grow → use insights to launch targeted campaigns and win-back flows

Ask: "Which step feels most valuable for your business right now?"

Slide 6 — The Customer Journey

SLIDE 6 — THE CUSTOMER JOURNEY (TARGET: 1 min)

The customer experience is designed to take less than 30 seconds for first-time sign-up.

1. Visit → customer comes to your business
2. Scan → one QR code scan on their phone
3. Share → first name and phone number only (no app download required)
4. Instant Member → they are enrolled and receive their first points immediately
5. Earn → every visit earns points or stamps
6. Redeem → exchange points for rewards you define
7. Return → rewards drive repeat visits

North Star: "A customer can join in under 30 seconds."

Slide 7 — Traditional vs OneMember

SLIDE 7 — TRADITIONAL vs ONEMEMBER (TARGET: 2 min)

Use this to handle objections before they are raised.

Traditional loyalty:

- Paper cards get lost or damaged
- No customer data collected
- Manual tracking, error-prone
- No automated communications
- No analytics or reporting
- Expensive to implement or scale

OneMember:

- Digital — works on any smartphone, no app download
 - Full member profile from first scan
 - Automated point tracking and rewards
 - Automated birthday emails, expiry reminders
 - Real-time dashboard and reports
 - Affordable flat monthly fee
-

Slide 8 — Benefits for Merchants

SLIDE 8 — BENEFITS FOR MERCHANTS (TARGET: 1 min)

Each benefit should connect to a real merchant pain point.

1. Grow your member database automatically with every customer visit
 2. Know your customers — demographics, visit frequency, spend patterns
 3. Send targeted promotions to the right customers at the right time
 4. Automate birthday and anniversary rewards — no manual effort
 5. Reduce reliance on discounting — use loyalty rewards instead
 6. One dashboard for members, transactions, rewards, and reports
 7. Affordable monthly subscription — no per-transaction fees
 8. Setup in under 10 minutes — no IT team required
-

Slide 9 — Benefits for Customers

SLIDE 9 — BENEFITS FOR CUSTOMERS (TARGET: 1 min)

Remind the merchant that a great customer experience drives adoption.

1. No app download required — works in any mobile browser
2. Join in under 30 seconds with just a name and phone number

3. Earn points or stamps on every visit automatically
 4. Redeem rewards instantly at point of sale
 5. Receive birthday rewards and special member offers
 6. Privacy-first — minimal data collection, no unnecessary permissions
 7. Works at every location of the same merchant chain
 8. Digital card always available — can never be lost or forgotten
-

Slide 10 — Business Intelligence

SLIDE 10 — BUSINESS INTELLIGENCE (TARGET: 1 min)

Position this as the future state — currently in roadmap.

"Right now you get a clear dashboard. In the next phase, OneMember will layer intelligence on top of your member data."

Capabilities coming:

- Member churn prediction — which customers are at risk of not returning
- Campaign performance analytics — which promotions drive the most revenue
- Spend segmentation — your top 20% of customers drive 80% of revenue
- Visit frequency heat maps — when are your busiest and quietest days
- Automated win-back — trigger an offer when a customer hasn't visited in 30 days

"We are building the CRM that local businesses have never had access to before."

Slide 11 — Future Vision

SLIDE 11 — FUTURE VISION (TARGET: 1 min)

This is the "why invest in this relationship" slide. Keep it brief — it is about direction, not promises.

Phase 1 (Now): Merchant loyalty foundation — membership, rewards, campaigns, analytics

Phase 2: Customer Wallet — customers hold their loyalty cards in a unified OneMember wallet app

Phase 3: Commerce — buy/sell within the OneMember ecosystem

Phase 4: POS Integration — replace or connect to point-of-sale systems

Phase 5: Inventory — smart inventory management linked to loyalty data

Phase 6: Accounting — integrate loyalty and sales data with accounting

Phase 7: AI — personalised recommendations, predictive analytics

Phase 8: Regional — expand beyond Thailand to Southeast Asia

"We are building the operating system for local business."

Slide 12 — Why OneMember is Different

SLIDE 12 — WHY ONEMEMBER IS DIFFERENT (TARGET: 1 min)

Use this to close out the story before the CTA.

1. Merchant-first design — every feature is built for the merchant's needs, not the customer's app store rating
2. No app download for customers — highest barrier to adoption is gone
3. Privacy by design — we collect the minimum data needed
4. Thailand-first localisation — Thai Baht, Thai language, local payment context
5. Affordable for SMEs — not enterprise pricing
6. Built to grow with you — from a single outlet to a chain of locations

"We built this for merchants like you."

Slide 13 — Call to Action

SLIDE 13 — CALL TO ACTION (TARGET: 1 min)

Close with clarity. Three options only.

Option A: "I'm ready — let's set up my account today."

→ Offer to open a laptop and register them now. Takes 5 minutes.

Option B: "I want to try it — can I see a demo?"

→ Offer a 15-minute live demo: register, create a campaign, simulate a customer scan.

Option C: "I'm interested but need more time."

→ Leave a one-page summary. Book a follow-up within 48 hours.

Do not leave without a next step. Every conversation should end with a date and time for a follow-up.
